# Northwest Hikes Travel App

Nirali Parikh
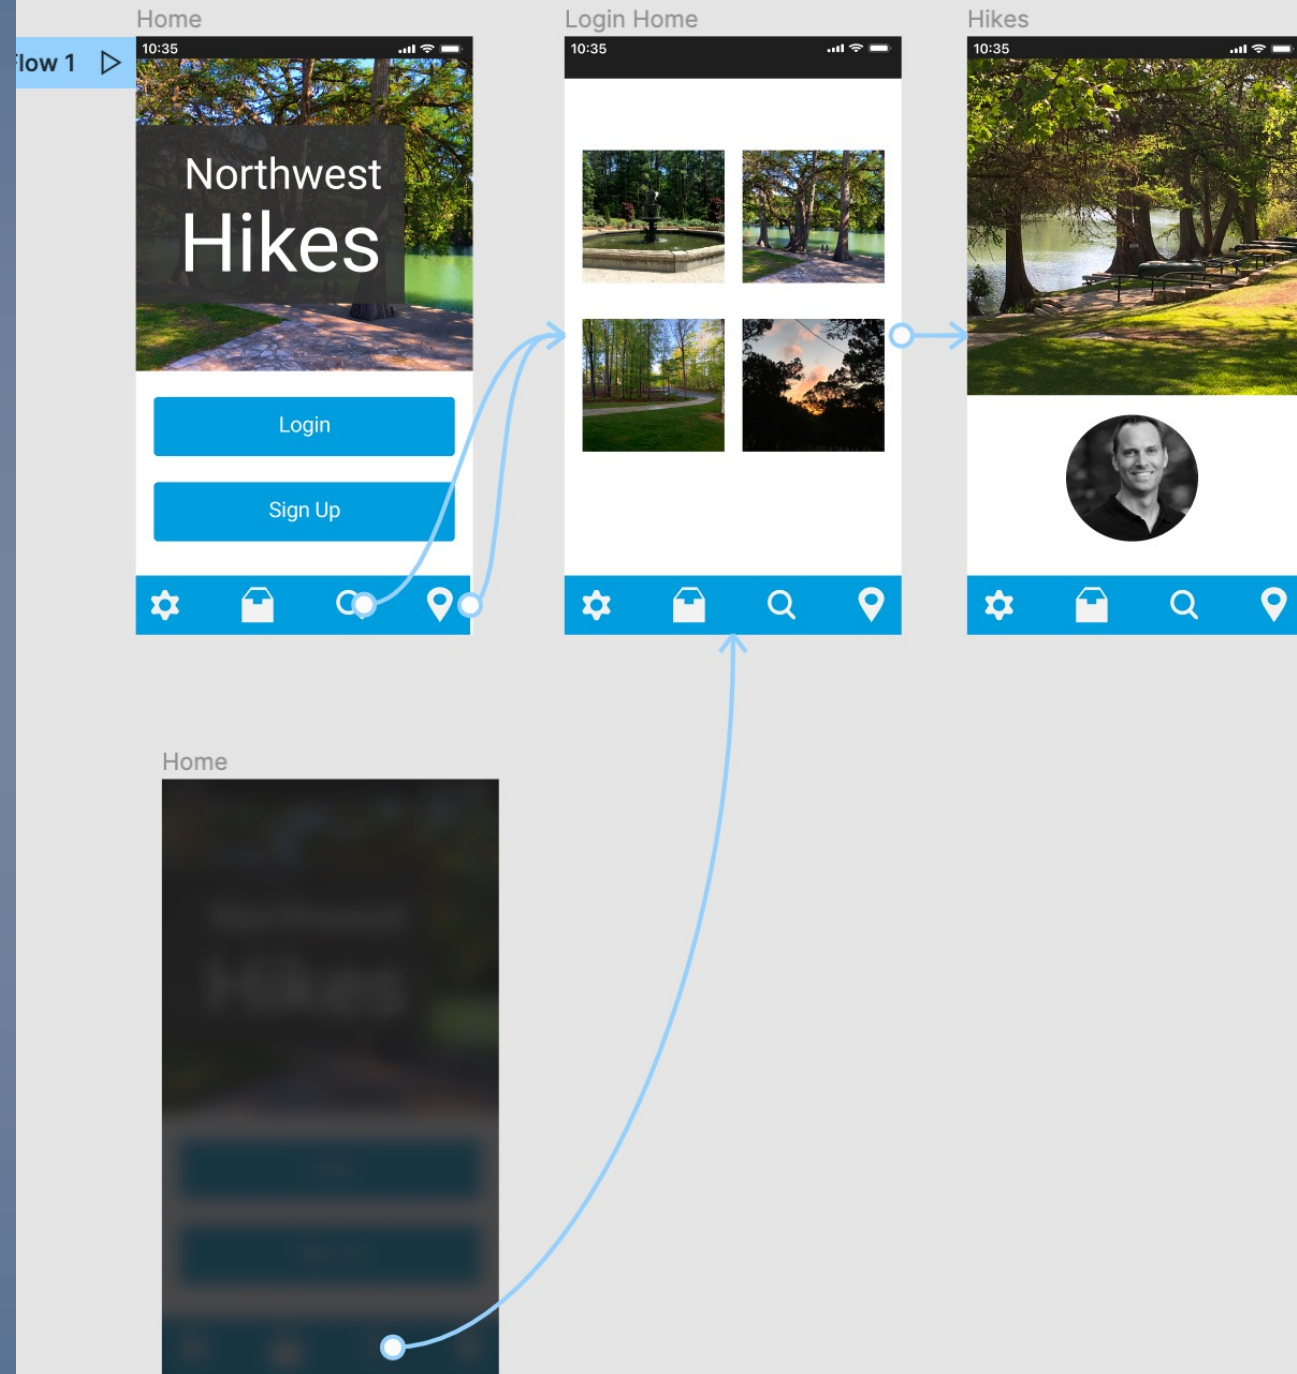

Purpose of Project

- This was a travel app that I created during a tutorial of a LinkedIn Learning course called "Learning Figma for UX Design."

- Used Figma to create the design and prototype.

- It is a travel app that gives users an outlook on Northwest Hikes with the feature of being able to save their trips and allowing them to glance at the hiking trails before visiting the location.

- The app allows users to save their completed trips in one app. It also allows the user to leave reviews on the hiking trails that they've visited.

Northwest Hikes Travel App UI

Workflow of the App

Live Prototype on Figma

Please click the link below to see the live prototype of the app on Figma:
